PROFESSIONAL SUMMARY

Aspiring SQL Developer with strong hands-on experience in MySQL, relational database design, and writing complex queries for real-world business problems. Proficient in JOINS, aggregations, subqueries, window functions, stored procedures, and query optimization. Currently pursuing BCA and actively building projects to strengthen SQL expertise.

TECHNICAL SKILLS

Database: MySQL 9.5

SQL Skills: JOINS (INNER, LEFT, RIGHT), Subqueries, Aggregations, GROUP BY, HAVING, Window Functions (RANK, DENSE_RANK, ROW_NUMBER, SUM OVER), CASE Statements, Stored Procedures, Indexing & Query Optimization, Views

Other Tools: Python (Basics), MySQL Command Line, VS Code, GitHub

PROJECTS

E-Commerce Sales Analysis | MySQL

- Designed relational database with 4 tables: Customers, Orders, Order_Items, Products
- Wrote complex JOIN queries to analyze customer orders, revenue, and product performance
- Used GROUP BY, HAVING, and aggregations to find top customers and best-selling products
- Implemented Window Functions (RANK, SUM OVER) to rank customers by total spending
- Created stored procedures for reusable business queries (GetDeptSummary, GetTopEarners)
- Optimized queries using indexing on frequently queried columns, avoiding SELECT *

Company HR Database | MySQL + Stored Procedures

- Created Employee and Department tables with foreign key relationships
- Built stored procedures with IN/OUT parameters for salary analysis and department reports
- Used CASE statements to classify employees by salary grade and region
- Wrote window function queries to rank employees by salary within departments
- Practiced query optimization techniques including index design and EXPLAIN keyword

ACHIEVEMENTS

- Solved 50+ real-world SQL business problems across multiple domains
- Built complete relational databases with proper normalization and foreign keys
- Mastered advanced SQL concepts: Window Functions, Stored Procedures, Query Optimization
- Maintained active GitHub repository with documented SQL projects

EDUCATION

Bachelor of Computer Applications (BCA) | 2024 – Present

Kisan Veer Mahavidyalaya, Wai

CURRENTLY LEARNING

- Python & Pandas for data manipulation and ETL pipeline development
- SQLAlchemy for Python-MySQL database connectivity
- Data Engineering concepts and pipeline architecture
